The Industry Internship Programme (IIP) provides students with an opportunity to gain valuable experiences beyond the classroom teaching.

It enables students to better appreciate the application of fundamental conceptual knowledge by allowing them to apply and relate what they have learnt in class to real-world industry projects/training/visits. Such experiences gained in internship attachments also allow students to familiarise themselves with the real-world working environment and to fine-tune their educational preparation for career choices after graduation.

The IIP is minimum 4 Weeks Industrial Training as a part of B.Tech semester 8th Curriculum. Out of 4 weeks Industrial Training 2 weeks must be continuous in nature.

Student may start his/her training starting from 3rd semester onwards and has to complete before the final semester end.

At the end student has to submit his/her IIP report to his /her Faculty supervisor/Project Guide.
