|---------------------------------|-------------------------------------------------------------------------------|
| <b>Subject Code: 1ET4050604</b> | <b>Subject Title: PROJECT</b>                                                 |
| <b>Pre-Requisite</b>            | <b>Understanding of Tools &amp; Technology and Database Management System</b> |

**RATIONALE:**

**COURSE OBJECTIVE:**

**TEACHING AND EVALUATION SCHEME:**

| <b>Teaching Scheme (Hours per week)</b> |          |           |        | <b>Evaluation Scheme (Marks)</b> |                       |                       |                       |
|-----------------------------------------|----------|-----------|--------|----------------------------------|-----------------------|-----------------------|-----------------------|
| Lecture                                 | Tutorial | Practical | Credit | Theory                           |                       | Practical             |                       |
|                                         |          |           |        | University Assessment            | Continuous Assessment | University Assessment | Continuous assessment |
| -                                       | -        | 6         | 3      | -                                | -                     | 60                    | 90                    |

**DETAILS OF COURSE CONTENTS:**

| <b>Sr. NO.</b> | <b>TOPIC</b>                                                                                                                         | <b>Total Hrs.</b> |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| 1              | <b>Implementation</b><br>1.1.All or most of the facilities of the software and the hardware must be fully exploited.                 | 24                |
| 2              | <b>Testing</b><br>2.1 Involve clear evidence of end-user testing<br>2.2 Test outputs should be fully annotated and cross-referenced. | 14                |
| 3              | <b>Evaluation</b><br>3.1 Create clearly a full range of qualitative and quantitative criteria for evaluating the solution.           | 10                |
| 4              | <b>Layout &amp; Report Generation</b><br>4.1 Project should be able to generate various reports using report generation tools.       | 10                |

**COURSE OUTCOME:**

After successful completion of this course, student will be able to

1. Develop an application using different technology
2. Learn how to work in a team.

Think and apply new ideas in developing a project.
