

Branch Name:	Civil engineering
Program Code:	ET401
Course Name:	Public Health Engineering
Course Code:	2ET4010503
Pre-requisite Course:	---

COURSE OBJECTIVE:

Following are the objectives of this course:

- To learn the principles for identification of sources of surface and subsurface water
- To learn calculation of population and requirement of drinking water
- To understand the plotting of water supply scheme highlighting different features
- To know evaluation of characteristics and treatment of sewage.

TEACHING AND EVALUATION SCHEME:

Teaching Scheme (Hours per week)				Evaluation Scheme (Marks)			
Lecture	Tutorial	Practical	Credit	Theory		Practical	
				University Assessment	Continuous Assessment	University Assessment	Continuous assessment
3	0	2	4	60	40	20	30

DETAILS OF COURSE CONTENTS:

S. NO.	TOPIC	Total Hrs.	WEIGHTAGE
1	Sources, Demand and Quality of water: 1.1 Water supply schemes - Objectives, components, 1.2 Sources of water: Surface and Subsurface sources of water 1.3 Intake Structures, Definition and types, Factors governing the location of an intake structure, Types of intakes. 1.4 Demand of water: Factors affecting rate of demand, Variations of water demands, 1.5 Forecasting of population, Methods of forecasting of population, (Simple problems on forecasting of population), Design period, estimating of quantity of water supply required for city or town. 1.6 Quality of water: Need for analysis of water, Characteristics of water- Physical, Chemical and Biological 1.7 Testing of water for Total solids, hardness, chlorides, dissolved Oxygen, pH, Fluoride, Nitrogen and its compounds, Bacteriological tests, E coli, B coli index, MPN, Sampling of water, Water quality standards as per IS 10500.	08	18%
2	Purification of water: 2.1. Purification of Water: Objectives of water treatment,	10	24%

	Aeration- objects and methods of aeration. 2.2. Plain sedimentation, Sedimentation with coagulation, principles of coagulation, types of coagulants, Jar Test, process of coagulation, types of sedimentation tanks, Clary-flocculator. 2.3. Filtration - mechanization of filtration, classification of filters: slow sand filter, rapid sand filter, pressure filter. 2.4. Construction and working of slow sand filter and rapid sand filter, operational problems in filtration. 2.5. Disinfection: Objects, methods of disinfection. 2.6. Chlorination- Application of chlorine forms of chlorination, types of chlorination practices, residual chlorine and its importance, Flow diagram of water treatment plants. 2.7. Miscellaneous water Treatments: Introduction to water softening, DE fluoridation techniques.		
3	Conveyance and Distribution of water: 3.1 Conveyance: Types of Pipes used for conveyance of water, choice of pipe material. 3.2 Types of joints & Types of valves- their use, location and function on a pipeline. 3.3 Distribution of water: Methods of distribution of water- Gravity, pumping, and combined system, Service reservoirs - functions and types 3.4 Layouts of distribution of Water-Dead end system, grid iron system, circular system, radial system; their suitability advantages and disadvantages.	07	17%
4	Domestic sewage and System of Sewerages: 4.1 Building Sanitation: Necessity of sanitation, Necessity to treat domestic sewage, Definitions- Sewage, sullage, types of sewage. 4.2 Definition of the terms related to Building Sanitation Civil Engineering. Water pipe, Rain water pipe, Soil pipe, Sullage pipe, Vent pipe. 4.3 Traps types, qualities of good trap. Systems of plumbing - one pipe, two pipe, single stack, choice of system. 4.4 Systems of Sewerage and Sewer Appurtenances: Types of Sewers, Systems of sewerage, self-cleansing velocity and non-scouring velocity, laying. 4.5 Manholes and Drop Manhole-component parts, location, spacing, construction details, Sewer Inlets, Street Inlets. 4.6 Discuss Methods of sewage collection 4.7 Sewers cleaning operations. 4.8 Safety measures for sewer-men	10	24%
5	Characteristics and treatment of Sewage: 5.1 Analysis of sewage: Characteristics of sewage, B.O.D., C.O.D. and its significance. Central Pollution Control Board Norms for discharge of treated sewage.	07	17%

	5.2 Objects of sewage treatment and flow diagram of conventional sewage treatment plant. 5.3 Methods of sewage disposal 5.4 Different recycling method with respect to quality of waste water 5.5 Septic tank, Recycling and Reuse of domestic waste.		
--	--	--	--

LIST OF PRACTICAL:

The exercises/practical/experiments should be properly designed and implemented with an attempt to develop different types of practical skills so that students are able to acquire the competencies (Program outcomes). Following is the list of exercises/practical/experiments for guidance.

SR. No.	Experiment
1	Determine pH value of given sample of water.
2	Determine the turbidity of the given sample of water.
3	Determine residual chlorine in a given sample of water.
4	Determine suspended, dissolved solids and total solids of given sample of water.
5	Determine the dissolved oxygen in a sample of water.
6	Determine the optimum dose of coagulant in a given raw water sample by jar test.
7	Determine B.O.D. of given sample of sewage.
8	Determine pH value of given sample of sewage.
9	Determine suspended solids dissolved and total solids for sample of sewage.
10	Determine the dissolved oxygen in the given sample of sewage.
11	Determine C.O.D. of given sample of sewage.
FIELD VISIT AND TUTORIALS	
12	Undertake a field visit to water treatment plant and prepare a report.
13	Draw sketches of various valves used in water supply pipe line
14	Draw a sketch of one pipe and two pipe system of plumbing
15	Prepare a report of a field visit to sewage treatment plant

Course Learning Outcomes (CLO): On completion of this course, the students will be able to:

CLO	Description	Bloom's Taxonomy Level
CLO1	Know the procedure to identify the sources of surface and subsurface water	1 Remembering 2 Understanding
CLO2	Estimate the quantity of drinking water required for a population	3 Applying
CLO3	Draw labeled layout for water supply scheme.	2 Understanding 4 Analyzing
CLO4	Device suitable water treatment technique.	5 Evaluating 2 Understanding
CLO5	Evaluate the characteristics and suggest treatment of sewage	5 Evaluating 2 Understanding
CLO6	Know the sewage disposal method.	4 Analyzing

Course Learning Outcomes	Program Outcomes (Po's)											
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CLO1	L											
CLO2	H	M										
CLO3	L				H		H					
CLO4	M					L						H
CLO5	H	L		L								
CLO6	L	L		L			L		H	H		

H: High, M: Medium, L: Low
